SUMMARY

Detail-oriented and **AI**-driven **Quality Assurance Engineer** with nearly 3 years of experience in automation and manual testing, specializing in QA Automation Frameworks, AI-Integrated Testing, and MCP Context Engineering. Bringing a unique perspective as a QA professional with a Developer's Mind and an End-User's Mind. Focused on delivering precision-driven, scalable, and AI-powered test solutions that bridge the gap between traditional QA and modern AI-driven processes. Proven expertise in automation testing, API validation, rapid AI development, and context-based testing frameworks.

PROFESSIONAL EXPERIENCE

CodeMax IT Solutions Pvt. Ltd. | Full-time
June 2022 – Present (3 yrs+)

QA Analyst III | Oct 2025 – Present

- Core member of the QA R&D division, contributing to next-generation QA innovation initiatives.
- Actively working on Generative AI, Agentic AI, and MCP-style testing frameworks for FinTech products.
- Driving automation excellence through AI-assisted testing strategies and scalable QA architectures.
- Collaborating closely with developers, analysts, and stakeholders to ensure quality, performance, and reliability of financial systems.

QA Analyst II (Automation) | Jun 2025 – Oct 2025

- Led QA automation initiatives with strong focus on AI-powered automation frameworks.
- Specialized in MCP Context Engineering Frameworks for rapid AI development and testing.
- Integrated API testing, Playwright automation, and SaaS AI chatbot validation into end-to-end QA pipelines.

Software Quality Analyst | Sep 2022 – Jun 2025

- Delivered high-impact QA solutions with 1000+ automated test cases and 1000+ API validations across multiple releases.

- Built scalable and maintainable automated tests using Selenium WebDriver, TestSigma, JMeter, Playwright, and N8N workflows.
- Identified critical defects early, significantly improving product stability and release confidence.
- Deployed Redis and OpenSearch for QA monitoring and enhanced reporting.
- Worked extensively with Docker Desktop, Portainer, Postman, Git, Python, and Flask.

ACHIEVEMENTS

- Awarded **"Spotlight Award of the Quarter" (July – September 2024)**
  Recognized as **Quality Analyst of the Quarter** for outstanding contributions and impact in QA Automation.

PREVIOUS EXPERIENCE

Muthoot Finance Ltd. | Junior Relationship Executive | 2021 – 2022

- Managed cash transactions, gold loan processing, customer service, and recovery initiatives.

Indian Coast Guard Air Store Depot, INS Hansa – Goa
Desktop Support Technician | 2019 – 2021

- Provided hardware, software, and network support for Indian Coast Guard operations.

TECHNICAL SKILLS

Automation & Testing Frameworks

- Selenium, Playwright (including Playwright MCP), TestSigma, TestProject, JMeter

Vision-Based QA Innovation

- AI Vision Models for UI object recognition (Vision QA automation prototype)

Programming & Scripting

- Python, JavaScript

API Testing & Automation

- Postman, Supertest, Dockerized API pipelines

Version Control & CI/CD

- Git, Docker Desktop, Portainer, Jenkins

Databases

- Redis, MongoDB, MySQL, PostgreSQL, Supabase

AI & SaaS Tools

- Together AI, Hugging Face, Groq, Notebook LM, RAG Chatbots, SaaS AI Chatbots, N8N (*Includes RAG, chatbot automation, and AI orchestration tools*)

Monitoring, Reporting & Analytics

- OpenSearch, Redis

Test Management & Methodologies

- Test case design, test analysis, Agile, MCP Context Engineering

Soft Skills

- Strong problem solving, end-user mindset, rapid QA delivery, collaboration

---

KEY PROJECTS & INNOVATIONS

SaaS AI RAG Chatbot for Real-Time Interactions

Built a production-ready retrieval-augmented generation chatbot for enhanced customer support and real-time query resolution using Flask, Redis, and Together AI.

MCP Context Engineering Framework for Rapid AI Testing

Developed context engineering frameworks that accelerate testing and validation for AI-centric workflows across multiple QA touchpoints. Tools used (Playwright MCP server, and many other MCP servers.)

FinTech QA Automation Suite

Comprehensive test automation suite for financial applications using Selenium, Playwright, JMeter, and Postman with automated API verification.

Vision-Based QA Automation Framework

Prototyping an AI-led vision model based QA automation framework that accelerates UI test creation by using AI vision models to locate UI elements the way a human tester sees them. No DOM selectors, no brittle scripts.

CERTIFICATIONS

1. Mastering Generative AI for Software Testers & QA – LinkedIn Learning
2. AWS Builder Online Series
3. Advanced QA Bootcamp – Crio.Do
4. Introduction to Clean Testing – TestSigma
5. National Leadership Programme for Self-Transformation – Sri Sathya Sai Organization (2023)

EDUCATION

Bachelor of Computer Applications (2018 – 2021)
Don Bosco College, Panjim, Goa

Higher Secondary (2016 – 2018)
MES College, Zuarinagar

VOLUNTEER EXPERIENCE

Member, Sri Sathya Sai Seva Organizations India.

- Led disaster management, road safety, CPR, and fire safety awareness events.
