PROFESSIONAL SUMMARY

SDET / QA Automation Engineer with 4+ years of QA experience building and scaling automated testing for FinTech and SaaS products. Hands-on with Playwright, Python, JavaScript, Postman, Supertest, JMeter, Jenkins, Docker, Git/GitHub, and relational/NoSQL databases. Delivered 1,000+ automated test cases and 1,000+ API validations across releases, with experience creating maintainable automation suites, validating UI and back-end workflows, and improving test feedback in Agile delivery. Currently focused on AI-assisted QA, Generative AI, Agentic AI, and MCP-based testing approaches to accelerate test design, execution, and analysis. Also designs, builds and ships full-stack products, including Gym Daddy, a multi-tenant SaaS in production guarded by 1,200+ automated test files.

TECHNICAL SKILLS

Automation & Test Engineering: Playwright, Playwright MCP, TestSigma, TestProject, test framework design, UI/E2E automation

Programming & API Testing: Python, JavaScript, TypeScript, Postman, Supertest, REST API validation, Flask

Performance & CI/CD: JMeter, Jenkins, GitHub Actions, Docker, Docker Desktop, Portainer, Git, GitHub

Databases & Data Validation: MySQL, PostgreSQL, MongoDB, Redis, Supabase

AI-Enhanced QA: Generative AI, Agentic AI, MCP Context Engineering, AI vision-based QA prototyping, RAG/SaaS chatbot validation

Product Engineering: Next.js, React, Node.js, Express, FastAPI, PostgreSQL row-level security, Prisma, Capacitor, Tauri

Ways of Working: Agile, test case design, test analysis, defect investigation, release validation, cross-functional collaboration

PROFESSIONAL EXPERIENCE

CodeMax IT Solutions Pvt. Ltd. | Goa, India | Jun 2022 – Present

QA Analyst III | Oct 2025 – Present

- Core member of the QA R&D function, driving automation architecture and AI-assisted testing initiatives for FinTech products.
- Design and evolve scalable testing approaches across UI, API, end-to-end, and performance layers using Playwright, Postman/Supertest, and JMeter.
- Partner with developers, analysts, and stakeholders in Agile delivery to improve testability, surface risk early, and strengthen release confidence.
- Evaluate Generative AI, Agentic AI, and MCP-based workflows to improve test generation, maintenance, analysis, and QA productivity.

QA Analyst II (Automation) | Jun 2025 – Oct 2025

- Led QA automation initiatives focused on maintainable frameworks and high-value regression coverage.
- Integrated Playwright UI automation, API validation, and SaaS AI chatbot testing into end-to-end QA pipelines.
- Developed MCP context-engineering approaches for rapid AI-centric testing and validation across multiple QA touchpoints.

Software Quality Analyst | Sep 2022 – Jun 2025

- Delivered 1,000+ automated test cases and 1,000+ API validations across multiple releases, helping teams detect defects earlier and ship with higher confidence.
- Built scalable automated coverage using Playwright, TestSigma, JMeter, and Python/JavaScript-based tooling.
- Performed API and integration validation with Postman/Supertest and data checks across MySQL, PostgreSQL, MongoDB, Redis, and Supabase environments.
- Used Jenkins, Docker, Git, Portainer, Redis, and OpenSearch to support repeatable QA execution, monitoring, and reporting.

PROJECTS

Gym Daddy: Multi-Tenant Gym Management SaaS | Founder & Sole Engineer | 2025 – Present | gymdaddy.in

- Built with Next.js, TypeScript, Supabase PostgreSQL row-level security and Prisma, with Android (Capacitor) and desktop (Tauri) apps, ZKTeco biometric attendance and GST invoicing.
- Guarded by 1,200+ automated test files (unit, API, RLS/RBAC and Playwright end-to-end) and 7 GitHub Actions CI workflows.

FinTech QA Automation Suite | CodeMax IT Solutions

- Built and maintained automation coverage for financial applications using Playwright, JMeter, Postman, and automated API verification, with emphasis on repeatability, regression confidence, and maintainability.

PrintSaathi: Offline Android App for Print Shops | Sole Engineer | 2026

- Preact and TypeScript UI on Capacitor, with a Kotlin engine that parses customer files in an isolated, permission-less process; release builds ship without internet permission, verified on the built APK.
- Tested with Vitest, Playwright with axe, and Android instrumentation tests across Android 7–16 emulators, with enforced bundle budgets and a pre-commit verification gate; trials in real print shops are next.

AI Concierge & Messaging for a Travel Booking Platform | Client Engagement | 2026

- Streaming RAG chat widget (Shadow DOM embed, MongoDB Atlas Vector Search, Gemini 2.0 Flash with Groq and xAI fallback) and a real-time host–guest messaging SDK (Express, Socket.IO, MongoDB, Redis); mobile QA gates with Detox and Maestro.

VisionQA: Natural-Language Test Authoring | 2026

- Natural-language test steps mapped to Playwright actions by a rule-based executor (Next.js, FastAPI, Node agent, Redis, Docker Compose), with a vision-model element locator designed to reduce dependence on brittle DOM selectors.

ACHIEVEMENTS

- Spotlight Award of the Quarter (Jul – Sep 2024): recognized as Quality Analyst of the Quarter for contributions and impact in QA Automation.

CERTIFICATIONS

- Mastering Generative AI for Software Testers & QA – LinkedIn Learning
- Advanced QA Bootcamp – Crio.Do
- Introduction to Clean Testing – TestSigma
- AWS Builder Online Series
- National Leadership Programme for Self-Transformation – Sri Sathya Sai Organization (2023)

EDUCATION

Bachelor of Computer Applications (BCA) | Don Bosco College, Panjim, Goa | 2018 – 2021

Higher Secondary | MES College, Zuarinagar | 2016 – 2018

ADDITIONAL EXPERIENCE

Junior Relationship Executive | Muthoot Finance Ltd. | 2021 – 2022

Desktop Support Technician | Indian Coast Guard Air Store Depot, INS Hansa, Goa | 2019 – 2021

VOLUNTEER EXPERIENCE

Member, Sri Sathya Sai Seva Organizations India: led disaster management, road safety, CPR, and fire safety awareness events.
